## Objective

As a front-end web developer, I aim to work with React and Typescript to create dynamic and user-friendly websites and applications.

## Resume

Motivated professional passionate about logic and problem solving and with one and a half years of focused experience in React, Next.js, Typescript, Javascript, Tailwind, and Git. I also have a foundational understanding of Node.js, PostgreSQL databases, and authentication, demonstrating my commitment to continuous learning and growth. I am eager to learn and consistently strive for excellence in my work.

## Work experience

### Dynamox – Junior Front-end Web Developer (Aug/24 – Current)

- Build and maintain front-end interfaces in React using Vite and Next.js.

### Supernovax – Front-end Web Developer (May/23 – Dec/23)

- Implementation of full-stack applications using Next.js, Typescript, Tailwind, Contentlayer and Framer-motion;
- REST API integration;
- Code integration following best practices for versioning and Git feature branch workflow;
- Implementation of authentication using Next-Auth.

### CEPEDOC – Front-end Web Developer (Apr/23 – Jun/23)

- Build HTML pages for online course;
- Add styles using CSS and Bootstrap;
- Build interactive graphics using JS
- Version control using Git.
