## **Objective**

Work as a frontend web developer building websites and applications using React, Javascript, HTML, CSS and Styled Components.

## **Resume**

My name is Juliana, I have been studying web development for a few months and work as a freelancer. Recently, I've worked in a Project with the Brazilian Health Ministry developing web pages for distance learning courses, using HTML, CSS, JS and Bootstrap. Besides that, I've learned and built some projects also using React and Styled Components and I use Git, Github and Figma. I like working in teams and enjoy learning new things. I am changing my career from health to tech area – I am a post-graduated pharmacist.

## **Academic Education**

## **Projects**

- Pokédex:

Personal projects. Application that returns pokémons from an API. Displays details of each pokémon and features search by name and sort by type.

Built with: React, Styled Components and use of API.

Repository: <https://github.com/julianastahelin/pokemon-api-challenge>

Deploy: <https://pokemon-api-challenge-seven.vercel.app/>

- Portfolio:

Personal project built to show curriculum, projects and abilities in web development. Available in two languages.

Built with: React and Styled Components.

Repository: <https://github.com/julianastahelin/personal-portfolio>

Deploy: <https://julianastahelin.vercel.app/>

- Juflix:

Personal project. Catalog that returns movies from an API. It is possible to filter by genre, by best ranked movies and search by name.

Built with: HTML, CSS and JS.

Repository: <https://github.com/julianastahelin/juflix-movies-catalog>

Deploy: <https://julianastahelin.github.io/juflix-movies-catalog/>

## **Hard Skills**

- HTML;
- CSS;
- JS;
- React;
- Bootstrap;
- Use of API;
- Styled Components;
- Git;
- GitHub;
- Figma.

## **Soft skills**

- Teamwork;
- Proactivity;
- Flexibility.
