Objective

As a front-end web developer, I aim to work with Next.js or React, Typescript, and Tailwind to create dynamic and user-friendly websites and applications.

Resume

Motivated professional with a background in Pharmacy and a passion for logic and problem solving. Transitioning into front-end web development, I bring nearly one and a half years of focused experience in React, Next.js, Typescript, Javascript, Tailwind, and Git. I also have a foundational understanding of Node.js, PostgreSQL databases, and authentication, demonstrating my commitment to continuous learning and growth. I am eager to learn and consistently strive for excellence in my work.

Work experience

Supernovax – Front-end Web Developer (May/23 – Dec/23)

- Implementation of full-stack applications using Next.js, Typescript, Tailwind, Contentlayer and Framer-motion;
- REST API integration;
- Code integration following best practices for versioning and Git feature branch workflow;
- Implementation of authentication using Next-Auth.
