## **Objective**

Work as a front-end developer in the development of modern and scalable interfaces for websites and web applications, using React, TypeScript, and front-end best practices.

## **Resume**

Front-end developer with approximately 3 years of experience creating modern, accessible, and scalable interfaces. I work with React, TypeScript, Redux, Next.js, and Material UI, integrating REST APIs and using tools like Git, Postman, and Figma. I have contributed to a variety of projects, including educational platforms, medical record systems, and CMS-based websites. I focus on writing clean code, collaborating in agile teams, and continuous improvement, always striving to grow technically within the front-end ecosystem.

## **Work experience**

### **Dynamox – Front-end Web Developer (Aug/24 – Current)**

- Development of complex components and dynamic forms with validation using React and TypeScript;
- Creation of reusable and scalable components for use by other development teams;
- Advanced usage of Redux for managing global state;
- Integration with RESTful APIs and handling asynchronous data efficiently;
- Active participation in code reviews, promoting code quality, readability, and performance;
- Involvement in technical meetings to discuss front-end architecture and best practices;
- Maintenance and improvement of existing features with focus on performance and design system;
- Writing clear and concise technical documentation to support ongoing development and onboarding;
- Authoring of Architectural Decision Records (ADRs) to document key technical decisions;
- Implementation of unit tests using Jest and React Testing Library.

### **Front-end Web Developer – Freelancer (Apr/23 – Ago/24)**

- Implementation of full-stack web applications using Next.js, TypeScript, Tailwind, Redux, and Framer Motion;
- Integration with REST APIs;
- Code integration following version control best practices and the Git feature branch workflow;
- Implementation of authentication;

**Projects:**

- Development of a website using Next.js with a custom CMS built on the Notion API;
- Development of an interactive interface for an online course;
- Development of a business website using WordPress;
- Development of an online photography exhibition website with accessibility features.

**Academic Education**

- **Estácio** – Undergraduate in Analysis and Systems Development (Feb/2024 – current);
- **UFSC** – Multiprofessional Residency in Family Health (Mar/2020 – Feb/2022);
- **Anglia Ruskin University** – Academic exchange program – Program Science Without Borders (CsF/CNPq), Course in Public Health (Sep/2015 – Aug/2016);
- **UFSC** – Bachelor in Pharmacy (Mar/2012 – Jul/2019).

**Languages**

- Portuguese – native;
- English – fluent;
- French – basic;
- Spanish – basic.

**Hard skills**

- React, Redux, Next.js;
- Typescript, Javascript;
- Material UI, Tailwind, Bootstrap, Styled Components;
- HTML, CSS;
- Integration with REST API;
- Git, GitHub, Figma and Postman;
- Node.js, PostgreSQL;
- Jest, React Testing Library.

**Soft skills**

- Perseverance and determination;
- Self learning;
- Teamwork and flexibility;
- Proactivity.
