## Objective

Work as a front-end developer in the development of modern and scalable interfaces for websites and web applications, using React, TypeScript, and front-end best practices.

## Resume

Front-end developer with over 2 years of experience building modern, scalable, and quality-oriented web applications. I work with React, TypeScript, Next.js, Redux, and Material UI, developing robust, reusable interfaces with REST API integration. Experience with complex components, dynamic forms, and automated testing. I am proficient in Git and participate in code reviews and CI/CD pipeline monitoring, with a focus on best practices and continuous improvement.

## Work experience

### Front-end Web Developer – Riachuelo/Midway Financial (Oct/25 – Current)

- Development of scalable and reusable components using React and Typescript;
- Development of dynamic tools for content management and user interface creation;
- Migration of applications to modern frameworks and libraries, focusing on functionality and compatibility;
- Integration of front-end applications with REST APIs;
- Implementation of unit tests using Jest and React Testing Library to ensure code quality and reliability;
- Monitoring CI/CD pipelines, including analysis of build and deployment failures.

### Front-end Web Developer – Dynamox (Aug/24 – Oct/25)

- Development of complex components and dynamic forms with validation using React and TypeScript;
- Creation of complex and reusable components for use by development teams;
- Advanced usage of Redux for managing global state;
- Integration with RESTful APIs and handling asynchronous data efficiently;
- Active participation in code reviews, promoting code quality, readability, and performance;
- Involvement in technical meetings to discuss front-end architecture and best practices;
- Maintenance and improvement of existing features with focus on performance and design system;
- Writing clear and concise technical documentation to support ongoing development and onboarding;

- Authoring of Architectural Decision Records (ADRs) to document key technical decisions;
- Implementation of unit tests using Vitest and React Testing Library.

### **Front-end Web Developer – Freelancer (Apr/23 – Ago/24)**

- Implementation of full-stack web applications using Next.js, TypeScript, Tailwind, and Redux;
- Integration with REST APIs;
- Code integration following version control best practices and the Git feature branch workflow;

### **Projects**

- Development of a website using Next.js with a custom CMS built on the Notion API;
- Development of an interactive interface for an online course;
- Development of dashboard pages;
- Development of a business website using WordPress;
- Development of an online photography exhibition website with accessibility features.

### **Academic Education**

- **Estácio** – Undergraduate in Analysis and Systems Development (Feb/2024 – current);
- **UFSC** – Multiprofessional Residency in Family Health (Mar/2020 – Feb/2022);
- **Anglia Ruskin University** – Academic exchange program – Program Science Without Borders (CsF/CNPq), Course in Public Health (Sep/2015 – Aug/2016);
- **UFSC** – Bachelor in Pharmacy (Mar/2012 – Jul/2019).

### **Languages**

- Portuguese – native;
- English – fluent;
- French – basic;
- Spanish – basic.

### **Hard skills**

- React, Redux, Next.js;
- Typescript, Javascript;
- Material UI, Tailwind, Bootstrap, Styled Components;
- HTML, CSS;
- Integration with REST API;
- Git, GitHub, Figma and Postman;
- Jest, React Testing Library.

### **Soft skills**

- Perseverance and determination;
- Self learning;
- Teamwork and flexibility;
- Proactivity.
